

## IN THE CLAIMS

The following is a complete listing of the claims, and replaces all earlier versions and listings.

1. (canceled).

2. (currently amended): An information apparatus comprising a control unit which, when a notice “scheduled” date comes in a power-OFF status and then the apparatus is powered ON, ~~notifies~~ provides a notification of an-unnotified “schedule” as to which a reminder has not yet been given and for which an indicated notice time is has not passed more than a predetermined time back to in the past before a current date, as a reminder, and while does not ~~notify an-unnotified~~ provide any reminder as to a “schedule” as to which has-passed beyond an indicated notice time is more than the predetermined time back to in the past before the current date ~~as a reminder~~.

3. (canceled).

4. (currently amended): A method of controlling an information apparatus comprising the steps of:

~~notifying~~, when a notice “scheduled” date comes in a power-OFF status and then the power supply is powered ON, providing a notification of an-unnotified “schedule”

as to which no reminder has yet been given, and as to which has an indicated notice time is not passed more than a predetermined time back to the past before the notice “scheduled” date, as a reminder; and

~~not notifying,~~ when the notice “scheduled” date comes in the power-OFF status and then the power supply is powered ON, not providing a notification of an unnotified “schedule” as to which has passed beyond an indicated notice time is more than the predetermined time back to the past before the notice “scheduled” date as a reminder.

5. (canceled).

6. (currently amended): A program which causes a computer to execute:

a notification procedure of, when a notice “scheduled” date comes in a power-OFF status and then the power supply is powered ON, notifying providing a notification of an unnotified “schedule” as to which no reminder has been provided, and as to which has an indicated notice time is not passed more than a predetermined time back to in the past, before the notice “scheduled” date as a reminder; and

an unnotification procedure of, when the notice “scheduled” date comes in the power-OFF status and then the power supply is powered ON, not notifying providing a notification of the an unnotified “schedule” as to which has passed beyond the indicated notice time is more than the predetermined time back to in the past before the notice “scheduled” date as a reminder.

7. (canceled).

8. (currently amended): An information apparatus which is directed for ~~notifying~~ providing a notification of an unnotified schedule whose notice “scheduled” date registered in the apparatus comes while the apparatus is in a power-OFF status, wherein an unnotified schedule which is included in a set of a predetermined number of schedules ~~back to the past~~ that are most recent before a current date set in the information apparatus is ~~notified~~ communicated as a reminder, when the apparatus is powered ON, and

an unnotified schedule which is not included in ~~the predetermined number of schedules back to the past before the current date set in the information apparatus~~ that set, is not ~~notified~~ communicated as a reminder.

9. (canceled).

10. (currently amended): A method of notifying a schedule as to which ~~remains unnotified~~ no reminder has been given due to stop of a communication function even when a notice “scheduled” date ~~comes~~ has arrived in the function of notifying user of a schedule booked in an information apparatus,

wherein when the notification function is started thereafter, ~~an unnotified~~ schedule as to which no reminder has been given and which is included in a set of a

predetermined number of schedules ~~back to the past~~ that are most recent before a current date set in the information apparatus, is ~~notified~~ communicated as a reminder, and

~~an-unnotified~~ schedule which is not included in the ~~predetermined number of schedules back to the past before the current date set in the information apparatus~~ that set, is not ~~notified~~ communicated as a reminder.

11. (original): A notice method according to claim 10, wherein a stop status of a notification function is a status where an information apparatus is powered OFF, and the notification function is started when the information apparatus is powered ON.

12. (currently amended): A program which causes a computer to execute notification of a booked schedule and is directed for ~~notifying~~ providing a notification of a schedule as to which ~~remains-unnotified~~ no reminder has been given due to stop of a notification function even when a notice “scheduled” date ~~comes~~ arrives, wherein when the notification function is started thereafter,

~~an-unnotified~~ schedule as to which no reminder has been given and which is included in a set of a predetermined number of schedules ~~back to the past~~ most recent before a current date set in an information apparatus, is ~~notified~~ communicated as a reminder, and

~~an unnotified schedule which is not included in the predetermined number of schedules back to the past before the current date set in the information apparatus that~~  
~~set,~~ is not ~~notified~~ communicated as a reminder.

13. (original): A program according to claim 12, wherein a stop status of a notification function is a status where an information apparatus is powered OFF, and the notification function is started when the information apparatus is powered ON.
